

Panola Early College High School

Mentor/Induction Program

Mentoring For Teachers:

Each new faculty member at Panola Early College High School will be provided a mentor teacher. The mentor helps the new teacher with the district curriculum, instructional strategies, classroom management, district policies, and campus practices.

Mentoring For Students:

- PECHS students utilize daily small group mentoring sessions that are facilitated by a faculty member who provides intentional guidance regarding character education, Core Values, personal goal setting, time management, academic support, and success in a collegiate setting.
- PECHS utilizes a student peer program to help support new students. These students are older PECHS students who have been on campus for at least one year or more and who were selected by a faculty committee for consistently demonstrating leadership, scholarship, and citizenship. Their first function is to build relationships with the incoming freshmen. The students maintain these relationships with the freshmen throughout the year to support the newest members of our learning community,
